COMING UP

ARC (Assessment of Risk Controls)

ARC (Assessment of Risk Controls)

Standardized cyber risk management

Measurable approach

Budgeting and planning

Prioritized roadmap with costs understood

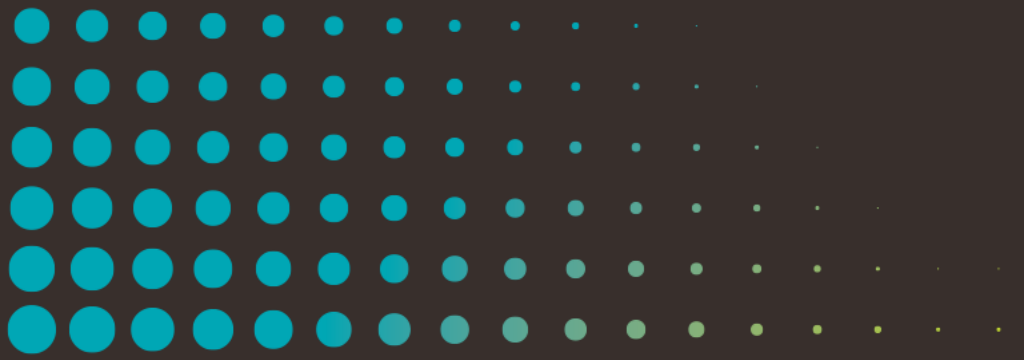

Proactive issue identification

ARC will build your Cyber Risk Register

Collaboration and shared understanding

Tech and Senior Leadership aligned

Budgeting and Planning

Less Guesswork

Budget forecasting

Objective, comparable data over subjective estimates

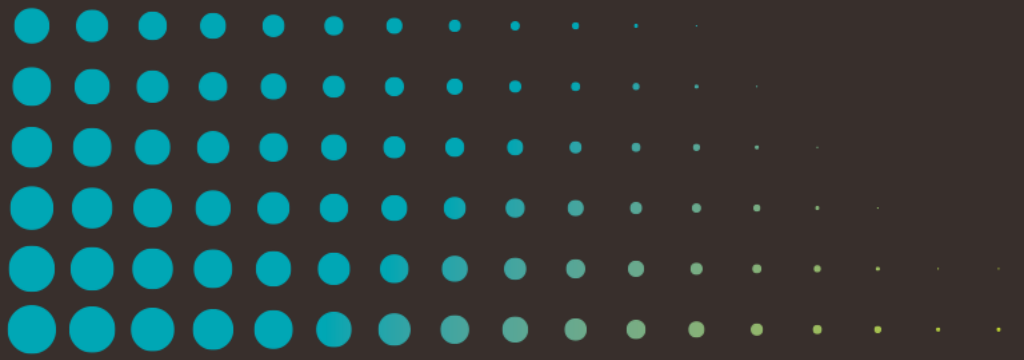

Prioritized roadmaps

Allocate funds to the highest-risk areas first

Compliance and audit readiness

Align spending with measurable risk reduction

We Frameworks

Why Use a Cybersecurity Framework?

Measuring What Matters to Protect What Counts

- Structured guidelines - a blueprint
- A common language with risks already identified
- Expert, tried and tested methodology
- Actionable steps

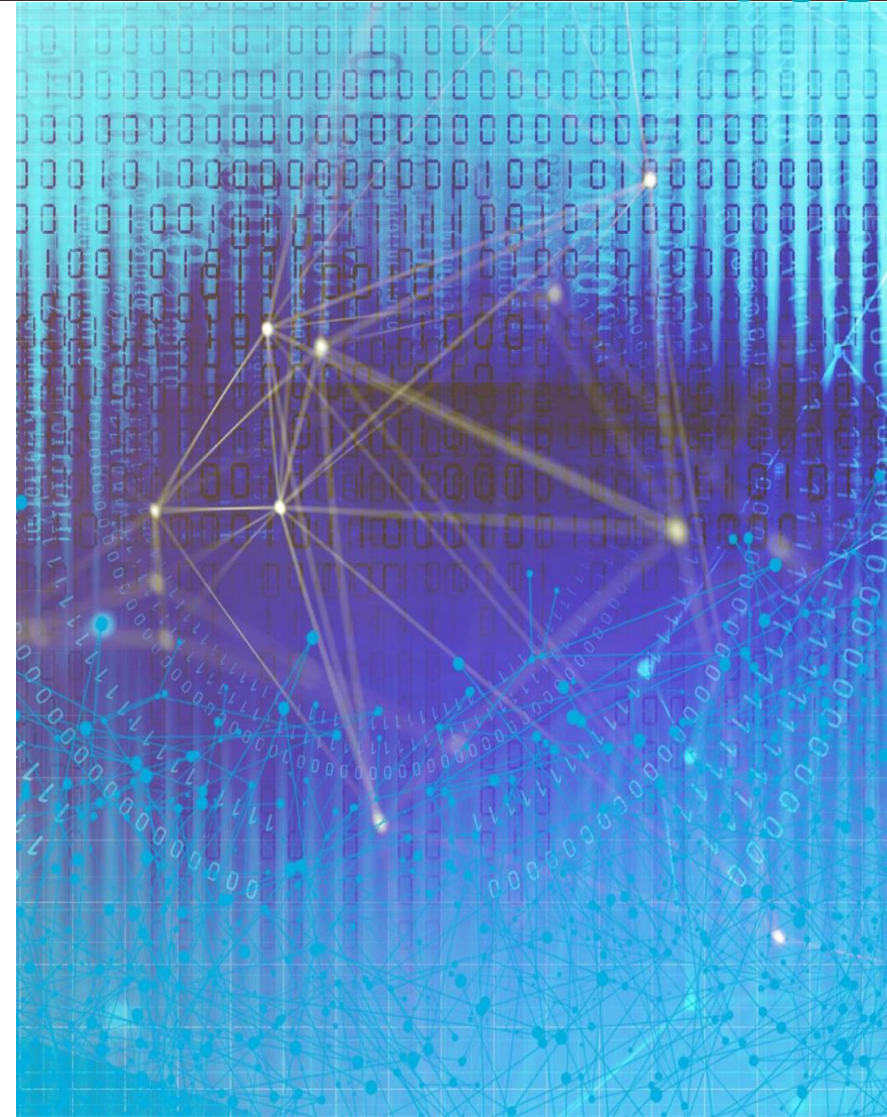

Program vs Control Frameworks

Program Frameworks

Governance, risk management, strategic alignment
NIST CSF, ISO 27001

Control Frameworks

Technical actions to secure systems
CIS Controls, NIST 800-53

Make strategy work

Strategic Governance

NIST CSF aligns efforts with organizational goals

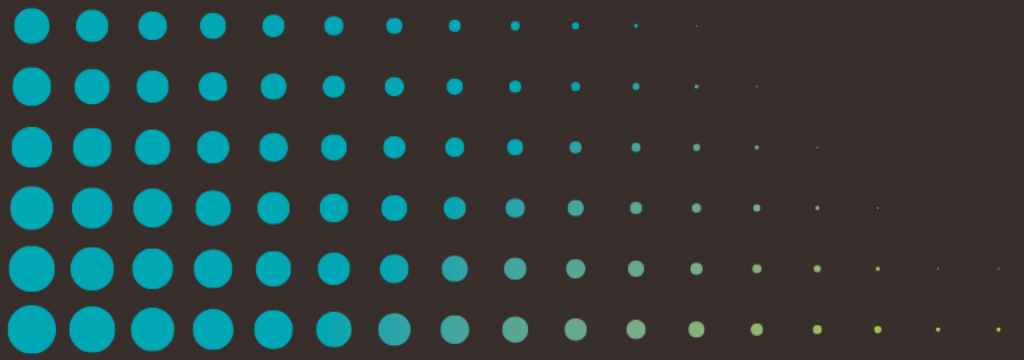

Tactical Implementation

CIS Controls provide actionable steps that IT can follow

Complimentary Approach

Together, they ensure cybersecurity initiatives are well-planned and properly executed for resilience

Who Is Doing What Exactly?

A Team Effort

Heads of IT

They oversee the technical **CIS Controls** assessment preparing the ground for NIST CSF

Secretary Treasurers

You lead the **NIST CSF** assessment emphasizing strategic risk management and governance

Focused Education completes the team

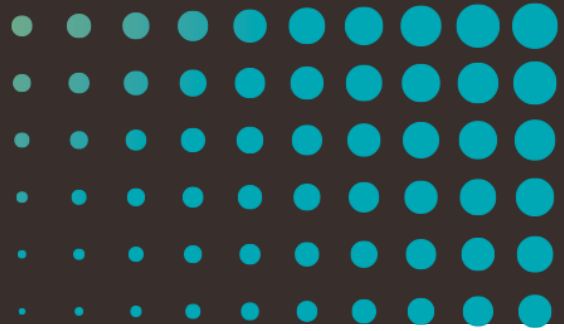

We develop the ARC platform, the questionnaires, the dashboards, and our expert team supports the work

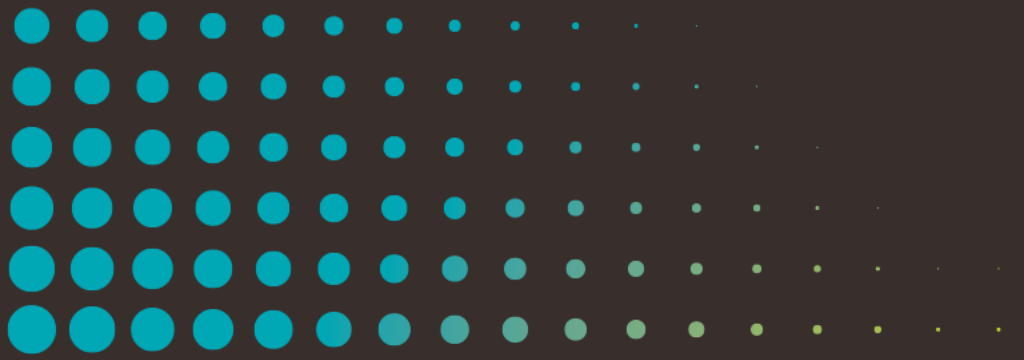

Training Through Assessment

Practical and contextual learning – it means more

Builds internal capacity and develops knowledgeable personnel to sustain and advance your cyber risk initiatives

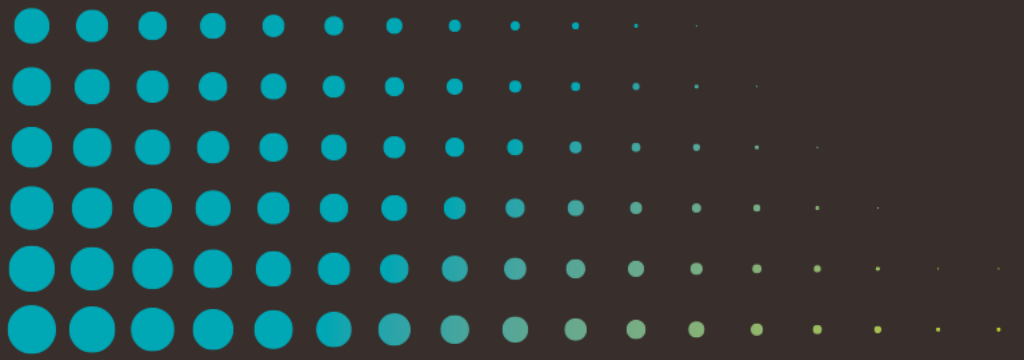

Unique Support Approach

Post Assessment Support

- Guided remediation process
- Expert advice and resources
- Collaborative project groups
- Measurable improvements

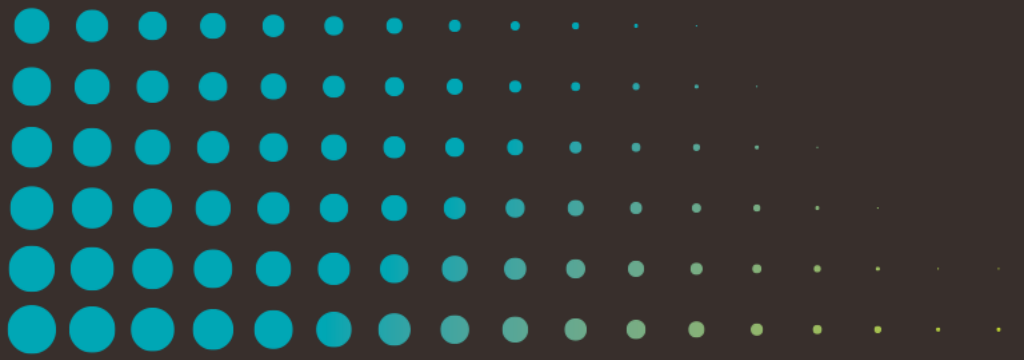

What's Happening When?

ARC Project Timeline

In Closing

You are not alone. We are safer together

Thank you for your time
